EDUCATION

University of Waterloo

Bachelor of Computer Science (Honours, Co-op)

Waterloo, ON

Sep 2026 – Apr 2031 (expected)

International Baccalaureate Diploma, R.E. Mountain Secondary School (Langley, BC)

2026

EXPERIENCE

Software Developer (Part-time)

Sep 2024 – Present

[Cortico Health](#) – North American clinical platform serving 5,000+ medical professionals

Remote (Vancouver, BC)

- Built and deployed **Cortico AI** across four EMR platforms on a North American clinical platform serving **5,000+ medical professionals**
- Built the **Django Channels** / **WebSocket** backend for streamed chat, agentic tools over patient-chart documents, resumable sessions, and access-controlled history
- Built a chart-grounded **AI PDF form-filler** for 300-field government forms; changed model output from repeated schemas to field IDs and values, cutting output tokens **5–10x** while preserving field-level source citations
- Expanded patient-chart extraction to **TELUS Med Access** and restored it after Juno's SPA rewrite by replacing legacy DOM scraping with its record API

Founding Engineer, ROXI (Contract, Part-time)

Nov 2024 – May 2025

[Ontario Rheumatology Association](#)

Remote

- Built and deployed ROXI's initial voice-to-EMR assistant and ambient scribe over a **527-field rheumatology schema**, helping RheumView reach **15% of ORA members** (38) by Nov 2025
- Built a citation-backed RAG pipeline over **188 BC and Canadian clinical-guideline PDFs** in Google Cloud Storage, using PyMuPDF, Weaviate, and FastAPI to ground answers and link each source

PROJECTS

BC STEM Opportunities | *React Native, TypeScript, Parse Server, OpenAI* bcstem.ca | Mar 2025 – Present

- Founded and launched a React Native/TypeScript directory of BC student STEM opportunities; lead a **six-person team** and was selected as a **Top 30 youth-impact team in Canada** in the 2025 Youth Impact Challenge
- Built semantic search and a human-reviewed **LLM-assisted crawler** with embedding deduplication and source verification; tuning cut review load **62%** (74 to 28 items), eliminating 46 manual checks per run

Parkinson's Voice Classification | *Python, XGBoost, scikit-learn, EfficientNet-B0 CNN*

[ProjectBoard](#) | 2025

- Compared acoustic-feature classifiers and an **EfficientNet-B0** spectrogram CNN on 302 sustained-vowel recordings; achieved **92.3% test accuracy**, within the 90%+ range reported in published controlled-condition studies

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, Dart, SQL

Backend: Django/Channels, FastAPI, PostgreSQL, WebSockets, OpenAI API

Frontend / Mobile: React, React Native/Expo, Flutter, MV3 browser extensions

Tools: GCP, Azure, Docker, GitHub Actions, Playwright, Vitest

AWARDS & LEADERSHIP

Selected for **CWSF 2025** from the top 0.2% of projects nationally; Bronze Medal and \$5,000+ in scholarships |

Ingenious+ regional winner: \$1,000 award presented at Government House by BC's Lieutenant Governor
